Re: Monitor Well Installation, Arkwood, Inc. Site

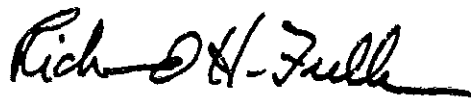

Dear Mr. Truskowski:

This letter documents our conference call of November 13, 1989 with Mr. Steve Calhoun. In that conversation, we requested that we be allowed to install monitor well MW-9, located in the railroad right-of-way area, as a 2-inch diameter well instead of a 4-inch diameter well as described in the work plan. This change was requested due to breakage of the larger diameter augers that were needed for the 4-inch diameter wells. In order to move in an expeditious manner, the 2-inch well was requested while the augers were being repaired. The smaller diameter well will not inhibit sampling. Should slug or pumping tests be desired, they can be accomplished on a 2-inch diameter well.

We appreciate your concurrence in this matter. Should you have any further questions, please do not hesitate to call.

Sincerely,

ERM-SOUTHWEST, INC.
